

X J Y - 8206A / B / C / D / E / F

METHYL VINYL MQ SILICONE RESIN

PRODUCT

XJY-8206 VMQ Silicone Resin is a polycondensate from four functional group siloxane(Q) and One functional group methyl siloxane(M), the molar mass is generally 2500-5000g/mol, the molecular structure of M and Q chain ratio and the structural nature of the M decision resin applications.

ADVANTAGE

- Excellent reinforcement performance;
- Excellent hardening effect;
- Improve sun protection index;
- Long lasting;
- Scratch resistant;
- Nonsticky, smoothing;

Powder

Addition Type Silicone Rubber

SPECIFICATION

Brand	XJY-8206A	XJY-8206B	XJY-8206C	XJY-8206D	XJY-8206E	XJY-8206F
Product Name	Methyl Vinyl MQ Silicone Resin					
Appearance	White Powder			Colorless Transparent Liquid		
Specification	Molecular Weight: 2500-4000, Vinyl Content: 1.8-2.2%	Molecular Weight: 2500-4000, Vinyl Content: 2.4-2.9%	Molecular Weight: 4000-5000, Vinyl Content: 2.4-2.9%	Molecular Weight: 2500-4000, Vinyl Content: 4.0-4.5%	Vinyl Content: 0.5-0.8%	Vinyl Content: 0.8-1.2%

INDUSTRIAL UTILIZATION

- High transparent and high hardness silicone, addition type silicone rubber reinforce stuffing;
- Low hardness silica gel, silicone gel;
- Hardening agent;

PACKAGING

- 15kg carton or 25kg fiber drum. Packaging options are available upon request.
- 50kg plastic drum or 200kg iron drum. Packaging options are available upon request.
